

MARION LEBEAU

Engineering student · Materials Science and Engineering

R&D Internship in Materials · Testing and Product Design (6 months) · February 2027

✉ marion.lebeau@imt-atlantique.net · ☎ +33 6 07 84 07 44 · in Marion LEBEAU · 🌐 Portfolio · 🚗 Driving licence

*Engineering student at IMT Atlantique and in the **MSc in Materials Science and Engineering**, I am looking for a **6-month R&D internship** starting in **February 2027**. Trained in the product development cycle, from **CAD modelling** to **mechanical testing on prototypes** (knee orthosis project in progress), I then wish to complete my final year as a **work-study programme in healthcare**, to specialise in **medical devices**.*

EDUCATION

- ongoing

MSc (2nd year) Materials Science and Engineering
Nancy ECM, Université de Lorraine
Advanced characterization techniques, mechanical testing, CAD.
- ongoing

General Engineering Degree
IMT Atlantique
Design and prototyping (3D printing, embedded programming), project management, multidisciplinary teamwork.
- 2023–2024

BSc Materials & Energy
Université de Picardie Jules Verne
Materials characterization, heat transfer.
- 2022–2023

2nd year Integrated Preparatory Programme (CUPGE), Mechanics
Université Toulouse III
- 2021–2022

Preparatory Classes (CPGE MPSI)
Lycée Militaire d'Autun

STUDENT INVOLVEMENT

- Inté-Events team** – Sports Office, IMT Atlantique
Feb. 2025–Feb. 2026 · Parasport tournament (600 participants), inter-school charity events
- Treasurer** – Student Federation, IMT Atlantique
Feb. 2025–Feb. 2026 · Financial management of 13 student associations (Nantes, Rennes, Brest), budget of €500k

TECHNICAL SKILLS

- Tensile

Vickers

Bending

Impact
- SEM

XRD

IR/FTIR

DSC

Raman

XPS
- EDX

NMR

UV-Vis
- Python

AutoCAD

Fusion 360

MATLAB
- 3D printing

MS Office

INTERESTS

- Football (15 years), regional level · University referee
- Triathlon
- Aircraft piloting, 40 flight hours
- Lego, board games

PROFESSIONAL EXPERIENCE

- R&D Engineering Intern**
CEA Cadarache · Mar.–Aug. 2026
Development of multi-parameter numerical simulation tools and automation of calculation schemes. Processing and visualisation of large volumes of results in Python.
- Workshop Internship, Car Mechanics**
SAX'Auto Garage · Jun.–Jul. 2025
Fault diagnosis and mechanical maintenance in a workshop: identification of worn or faulty parts, replacement and functional checks.
- Operational Reservist**
French Ministry of the Armed Forces · since Jul. 2021
French Gendarmerie (since 2025): surveillance and security
French Air and Space Force (2021–2025): Operation Sentinelle, Paris 2024 Olympics

PROJECTS

- Knee orthosis (ongoing)**
Université de Lorraine · 2026
Improvement of an existing orthosis: analysis of the standard model and identification of areas for improvement, redesign in Fusion 360, numerical testing, then a 3D-printed prototype assessed through mechanical testing.
- Low-tech wind turbine**
IMT Atlantique · 2025
Design of a low-cost mini wind turbine: blade modelling in Fusion 360, sizing and 3D printing, validation of mechanical behaviour through real-condition testing.
- Solar irradiance sensor**
IMT Atlantique · 2024
Development of a low-cost measuring sensor: casing design, embedded programming and calibration to ensure reliable measurements, up to a working prototype.
- Bioclimatic underground house**
UPJV · 2023
Final bachelor project aiming to design an energy-efficient home: AutoCAD plans and thermal modelling to compare insulation materials, leading to the choice of a solution presented on a scale model to a jury.

LANGUAGES & CERTIFICATIONS

- English B2** **German A2** **Spanish B1**
- Light Aircraft Pilot Licence (since 2020) – Beauvais-Tillé Aeroclub
- Lifeguard Certificate (BSB, 2024) – Amiens Sauvetage
- Aeronautical Initiation Certificate (BIA, 2021) – Lycée Marie Curie
